### HONEY'S STINGER

How do you fix a cracked pumpkin?

*With a pumpkin patch.*

## Privacy Tips for Cyber Security Month

- **Share with care! What you post can last a lifetime.** Before posting online, think about what others might learn about you and who might see it in the future.
- **Personal information is like money. Value it. Protect it.** Secure your devices using a strong password, passcodes or touch ID features.
- **When in doubt, throw it out.** Clicking on links in emails are often how bad guys access personal information. If an email looks weird, even if you know the person who sent it, it's best to delete.
- **Think before you act.** Ignore emails or communications that create a sense of urgency and require you to respond to a crisis, such as a problem with your bank account or taxes. This type of message is likely a scam.
- **For Cyber Security documents which can be personalized and printed for your members, visit our website**
