

Point. Click. Deposit.

Enable fast, secure, and easy check deposits from anywhere.

Our state-of-the-art FinCapture Remote Deposit Capture (RDC) API integrates seamlessly into existing mobile applications, allowing businesses to make deposits directly from their mobile devices or tablets. This powerful API provides a secure, efficient, and streamlined deposit experience, helping small to medium-sized businesses improve cash flow and reduce risks without requiring access to multiple systems.

Take Control of Field Payments with FinCapture RDC API:
A secure, mobile check deposit solution that improves cash flow, boosts efficiency, and reduces risk instantly.

- Eliminate trips to the bank with mobile check deposit that streamlines operations and saves time.
- Get paid faster with real-time deposits and built-in fraud detection for added security and control.

Designed for convenience, FinCapture RDC API offers a secure, mobile check deposit solution for businesses collecting payments in the field. It speeds up cash flow, reduces manual processing, and enhances security—empowering teams to deposit checks anytime, anywhere, without disrupting operations or productivity.

What Sets FinCapture Apart

- **API-Driven Integration:** Connects seamlessly with existing applications, providing easy setup for FIs.
- **Core-Independent Flexibility:** Operates seamlessly outside core systems, enabling easy integration and management.
- **Customizable Controls:** Set business-specific rules for deposit limits, duplicate detection, and endorsement checks.
- **Efficient Onboarding:** Self-service tools enable fast, easy setup for new business clients.

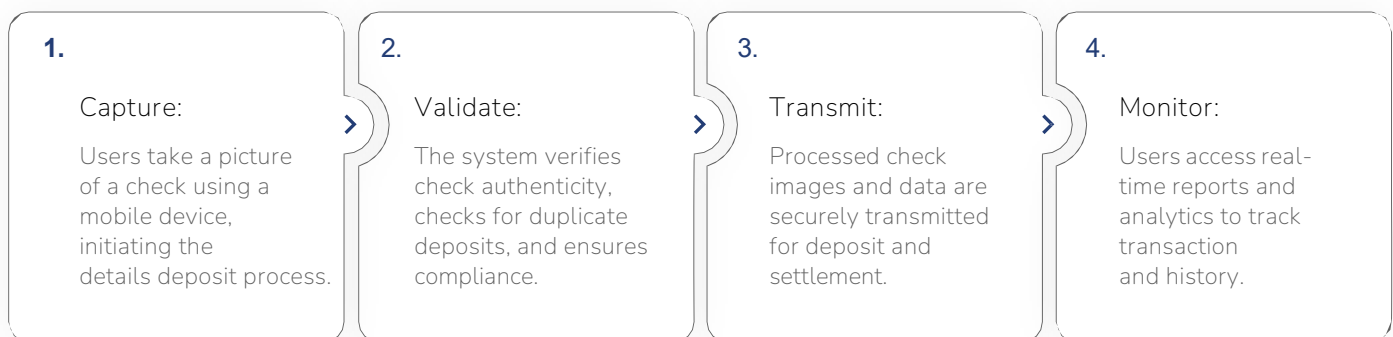

Key Benefits for Business Clients

- Improved Cash Flow: Instantly deposit checks and boost liquidity anywhere.
- Enhanced Security: Real-time risk scoring, duplicate detection, and customizable limits.
- Simplified Experience: One portal with self-service tools, status updates, and recordkeeping.

FinCapture Addresses Key Challenges

- Operational Inefficiencies: Eliminate manual processing with fast mobile deposits.
- Security Risks: Reduce fraud with real-time detection, duplicate alerts, and deposit controls.
- Fragmented Systems: Centralize deposits in one easily integrated platform.
- Limited Accessibility: Deposit checks anytime, anywhere with a mobile-first solution.

How FinCapture RDC API Works

Financial institutions that offer FinCapture RDC API empower their business clients to deposit checks quickly and securely without visiting a branch.

By reducing manual processing and accelerating deposits, FinCapture enhances cash flow, improves operational efficiency, and minimizes fraud risks. Businesses gain access to a seamless, fully digital check deposit experience that integrates effortlessly into their existing workflows—all while financial institutions strengthen their service offerings and customer relationships.
